Data Science Lab. Rey Juan Carlos University, Spain

New Bridges between Mathematics and Data Science

Valladolid

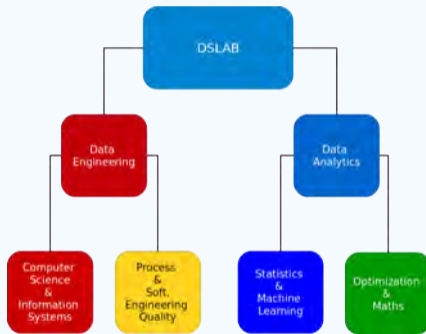

November 10, 2021

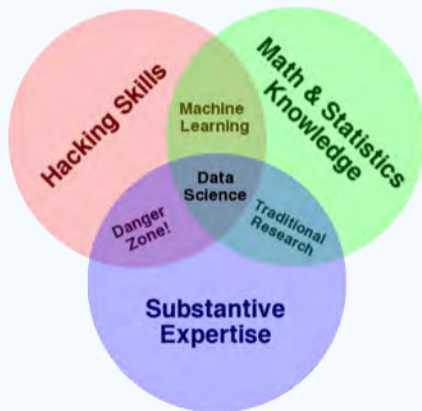

DSLAB. Data Science Laboratory

DSLAB is a multidisciplinary research group focused on **Foundations** and **Applications** of Data Science.

- **Education and training** of students, junior practitioners and senior professionals in DS methods, technologies and best practices.
- **Research and innovation projects**, exploring the creation of novel statistical and computational methods for scalable ML, optimisation as well as statistical modelling with complex data sets.
- **Consulting and strategic assessment** for companies, willing to identify and integrate DS technologies in their workflows, with special emphasis on performance, quality management and best practices.

ERICSSON 

Data Science Applied to Security in 5G Networks.
Adaptive Control of the Quality of User Experience.
